Not simulated clients (Protocol mismatch)

[IE 6 / XP](#) No FS¹ No SNI² Protocol mismatch (not simulated)

- (1) Clients that do not support Forward Secrecy (FS) are excluded when determining support for it.
- (2) No support for virtual SSL hosting (SNI). Connects to the default site if the server uses SNI.
- (3) Only first connection attempt simulated. Browsers sometimes retry with a lower protocol version.
- (R) Denotes a reference browser or client, with which we expect better effective security.
- (All) We use defaults, but some platforms do not use their best protocols and features (e.g., Java 6 & 7, older IE).
- (All) Certificate trust is not checked in handshake simulation, we only perform TLS handshake.**

- No, server keys and hostname not seen elsewhere with SSLv2
- (1) For a better understanding of this test, please read [this longer explanation](#)
- (2) Key usage data kindly provided by the [Censys](#) network search engine; original DROWN website [here](#)
- (3) Censys data is only indicative of possible key and certificate reuse; possibly out-of-date and not complete
